
Claims

We claim:

1. A process of manufacturing a decorative mirror, comprising one or more repetition of the following steps:
 - a. application of a mask that prevents metal deposition to a transparent substrate;
 - b. deposition of a reflective layer;
 - c. removal of the mask.
2. A process according to claim 1, further comprising the step of coating the uppermost metallic layer with a protective coating of paint or varnish.
3. A decorative mirror made by a process according to claim 1.
